

Storage Assist Computer is used to manage your storage without any other application selected or running. Like all others apps, this app (computer) is connected to your storage and you can use it to arrange or edit your data in the storage.

- 1. Use Storage Assist Linux for Windows or Linux Elastic base storage. This app contains: FileZilla and LibreOffice.
- 2. Use Storage Assist Windows for Windows storage. This app also contains: FileZilla, LibreOffice, AntRenamer, WeTransfer, PicaGeoTag, EXIF Tool, Phocus and GIMP.
- 3. Use Storage Assist and data compression to zip/unzip large files. This computer has 16vCPU and 64GB RAM. It makes zip/unzip process faster.

	<b>Storage Assist Computer LINUX</b> v1.1 ⓘ  2vCPU@2.5GHz, 8GB RAM Work with Storage directly. Includes FileZilla and LibreOffice	\$0.99 → \$0.96 /hr ⓘ <a href="#">Select</a>
